JD ICON

The unique features of an icon

conical connection

Made in Italy

THE CONICAL CONNECTION

The conical connection offers:

- Tight seal and high mechanical strength
- High level of mechanical stability under different load conditions
- Better force transition from the implant body to the prosthetic abutment
- Less stress on the prosthetic screw

The conical connection is significantly **superior in term of bacterial seal** as compared to other connection systems and it is more resistant to abutment movement and microgap enlargement under loading.

The internal conical connection also allows for platform shifting, allowing the preservation of the crestal bone and the volume of the surrounding soft tissue. This results in more **natural looking gums** and also supports **less radiographically detectable crestal bone loss**.

Whereas with other connections, platform shifting is achieved through the use of a smaller diameter abutment on a larger diameter implant collar, the internal conical connection has the shift built-in.

The hexagonal interlocking provides a choice of six different abutment positions providing **high restorative flexibility**.

SINGLE PROSTHETIC CONNECTION

features

- Single prosthetic connection for all diameters
- Dual system conical connection internal hexagonal
- Built-in platform switching
- Complete selection of temporary and final abutments for various heights and emergence profiles

JDICON

JDICON F

advantages

- Simplicity of clinical processes
- Reduces inventory and enhanced working flexibility
- Excellent connection stability
- Sealed connection: thanks to the connection design, there are no detectable microgaps at the implant-abutment in the area of the conical connection
- High mechanical strength
- Greater hard and soft tissue stability

PRODUCT SPECIFICATIONS

The JDIcon dental implants are available in the diameters and lengths shown in the following table:

IMPLANT DIAMETER	LENGTH	TIP DIAMETER	PLATFORM DIAMETER	ABUTMENT INTERFACE
Ø 3,9	8	2.5	3.9	3.4
	10, 11.5	2.4		
	13, 15, 18, 20	2.8		
Ø 4,3	6, 8	3.25	4	3.4
	10, 11.5, 13, 15	2.8		
Ø 5,0	6, 8, 10, 11.5, 13, 15	3.2	4.7	3.4

Note: all measurements in mm
