JDPTERYGO DRILLS KIT

less stress than ever on bones

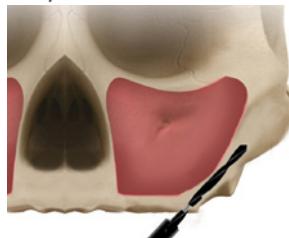

JDPterygo Drills Kit

The JDPterygo Drills Kit contains drills specifically designed for the insertion of JDPterygo, JDPterygo One and JDIcon Plus PT implants into the pterygoid bone. The kit contains longer drills for proper bone preparation in the apical and coronal areas. These drills allow a precise, safe and fast osteotomy.

Drilling Protocols

$\varnothing 3,3$

1. Start the osteotomy using JDPterygo drill $\varnothing 2.0\text{mm}$ at the same implant length to be inserted

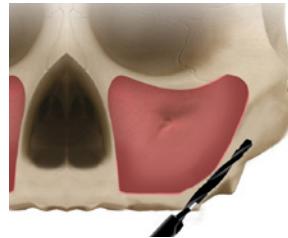

2. Complete the osteotomy with JDPterygo drill $\varnothing 2.8\text{mm}$ at the entrance for 6mm

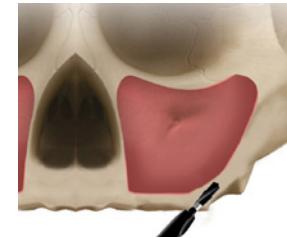

$\varnothing 4,0$

1. Start the osteotomy using JDPterygo drill $\varnothing 2.0\text{mm}$ at the same implant length to be inserted.

2. Continue using JDPterygo drill $\varnothing 2.4\text{mm}$ at the same implant length to be inserted.

3. Complete the osteotomy with JDPterygo drill $\varnothing 3.2\text{mm}$ at the entrance for 6mm.

Drills for non guided protocol:

| | |
|----------|-----------------------|
| JDDRPT20 | Drill Ø 2.0 JDPterygo |
| JDDRPT24 | Drill Ø 2.4 JDPterygo |
| JDDR101 | Drill Ø 2.8 JDPterygo |
| JDDRPT32 | Drill Ø 3.2 JDPterygo |
